OBJECTIVE

Second-year B.Tech CSE (AI & ML) student seeking a web development internship. Ship production full-stack applications with Next.js, TypeScript, and Supabase — including theweddingspace.in, a live wedding-venue booking platform with integrated payments.

EDUCATION

REVA University, Bangalore 2025 – 2029
B.Tech — Computer Science and Engineering (AI & ML)

PROJECTS

TheWeddingSpace — Full-Stack Wedding Venue Booking Platform Aug 2026 – Present
Next.js 16 · TypeScript · Supabase · Razorpay · Tailwind · Vercel · Live

- Built and shipped a production wedding-booking platform solo — from database schema to custom domain — in one week.
- Designed a 12-table PostgreSQL schema with Row Level Security and an `auth.uid()` trigger, ensuring customers can only access their own bookings while admins retain full control.
- Integrated Razorpay with server-side amount recomputation and HMAC-verified webhooks, preventing client-side payment manipulation.
- Delivered an 8-page admin CMS with inline price editing, drag-drop image uploads, and searchable DataTables across 5 entity types.

SKILLS

Frontend: React, Next.js 16, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend: Node.js, PostgreSQL, Supabase, REST APIs, Row Level Security

Payments & Ops: Razorpay, Vercel, Git, GitHub, Supabase Storage

Languages: TypeScript, JavaScript, Python, C, SQL

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

CERTIFICATIONS

- **Python for Data Science** — IBM SkillsBuild *Feb – Apr 2026*
- **Data Analysis using Python** — IBM SkillsBuild *Feb – Apr 2026*
- **Data Visualization using Python** — IBM SkillsBuild *Feb – Apr 2026*

ACHIEVEMENTS

- Shipped theweddingspace.in to production — live booking flow and Razorpay test-mode payment integration, deployed with SSL on a custom domain.
